

# EDUCATION

## Primary Learning Outcomes for EMS Music Workshops in Schools

Enterprise Music Scotland Education is dedicated to providing music education of the highest quality that is in line with Curriculum for Excellence.

### Essential Learning Outcomes

- Introduce and enhance children's experience of listening to music
- Explore live music through a modern context
- Introduce children to simple musical concepts.
- Provide opportunities for children to talk about the music they are listening to
- Enhance appreciation of music
- Learn how feelings and emotions can be recognised and represented through music where appropriate
- Develop listening and communication skills
- Listen to and be able to identify different styles of music
- Enhance the understanding of culture in Scotland and beyond where appropriate

We strongly believe that music should provide children with opportunities to contribute to, reflect on and respond to music within their own culture and that of others. As all education work within EMS is devised with regard to the learning needs of our specific audiences the outcomes above provide a general framework for all workshops.
